Phase 7: Integration & External Access
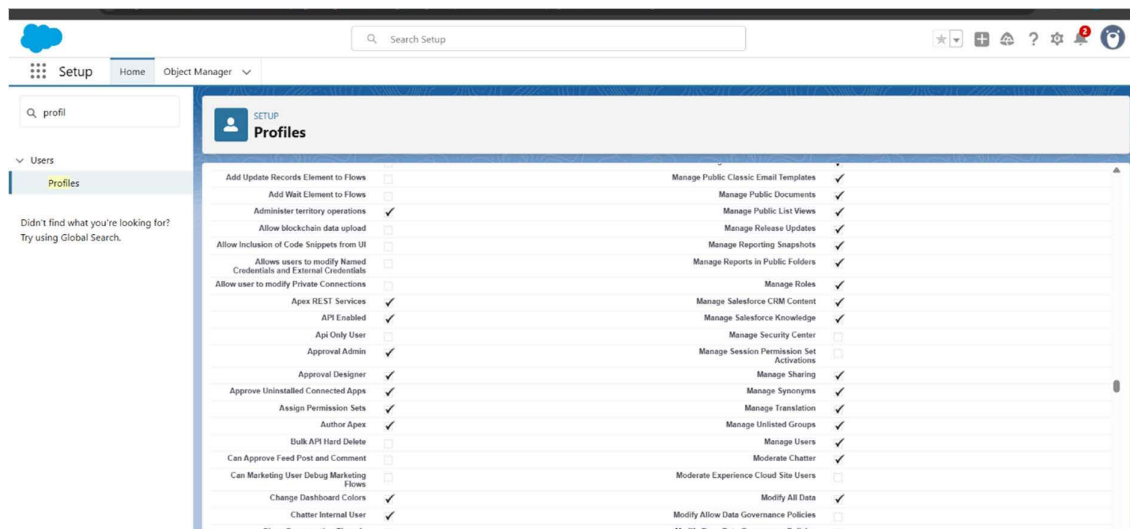

Purpose

To make the Leave Management System accessible via Salesforce's inbuilt REST API and prepare for future external integrations.
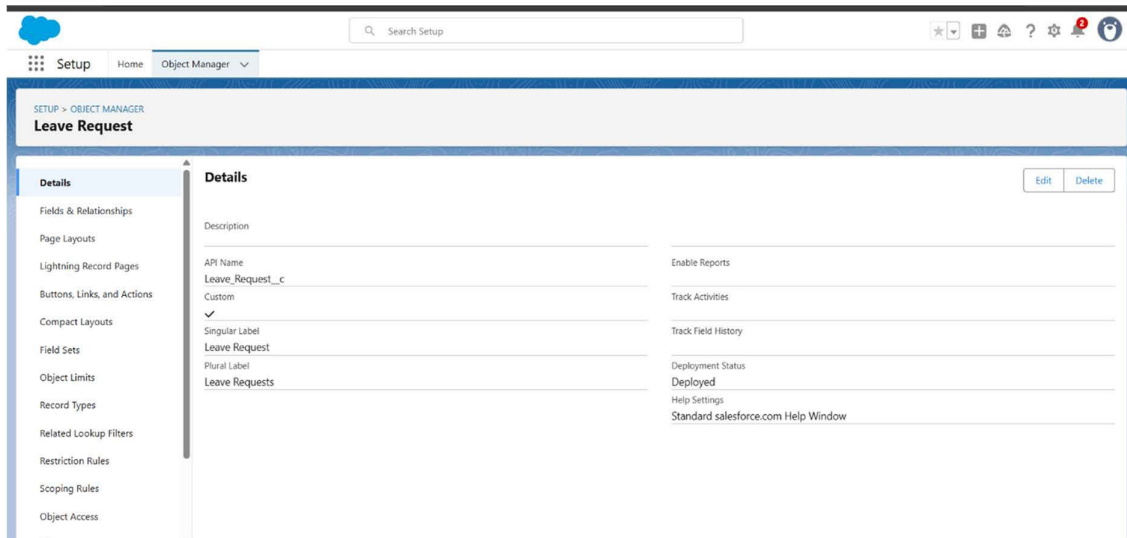

Steps Implemented

1. **Verify API Access in Org**

   o Go to **Setup → Profiles → [Your Profile] → Administrative Permissions**.

   o Ensure **API Enabled** is checked.

2. **Find Object API Name**

   o Go to **Setup → Object Manager → Leave_Request__c**.

   o Copy the **API Name** (Leave_Request__c).

3.Test API Access (Simple Way without coding)

- Go to your Salesforce Org URL, For example:

https://yourOrgName.my.salesforce.com/services/data/v60.0/sobjects/Leave_Request__c

- Paste this in browser → it will ask you to log in.
- If logged in, you'll see JSON response (object metadata).

4.Future Scope Mentioned

- Can be connected with HR system like **Workday** or **mobile app** to fetch leaves.

- No extra implementation required now.
